P R E F A C E

The Federal-State Market News Service began collecting weekly apple shipments for the week ending August 8, 1981. Collection of shipping point information and the issuing of daily market reports for the 1981-82 apple season began on September 8, 1981.

This publication is a summary of the Appalachian District apple production, shipments, F. O. B. sales, selected terminal sales, and distribution records for the 1981 apple crop.

The summary was prepared by the Federal-State Market News Service located in Martinsburg, WV. This office was operated by the United States Department of Agriculture, Agricultural Marketing Service cooperating with the Maryland, Pennsylvania, Virginia and West Virginia State Departments of Agriculture.

Truck shipments on a weekly basis were obtained directly from shippers.

The Appalachian District is composed of the following areas:

Virginia - Roanoke and nearby points, northward including the Shenandoah Valley and the growing areas immediately east of the Blue Ridge.

West Virginia - The four eastern counties of Jefferson, Berkeley, Morgan and Hampshire.

Maryland - The three eastern counties of Allegany, Washington and Frederick.

Pennsylvania - Primarily the southeastern counties of Franklin, Adams, York, Berks and Lehigh.

Robert F. Sweitzer,
Local Representative
Martinsburg, WV

REVIEW OF THE APPALACHIAN DISTRICT APPLE SEASON

PRODUCTION & SHIPMENTS: The four-state Appalachian District produced 1,093 million pounds of apples in 1981 according to the U. S. Department of Agriculture's Statistical Reporting Service. That was a decrease of nearly 18 percent from 1980 and 17 percent below the previous three year average of 1,323 pounds. Production by states in million pounds for 1981, 1980 and 1979, respectively, were: Maryland 73, 90, 85; Pennsylvania 400, 570, and 535; Virginia 420, 420 and 470 and West Virginia 200, 245, and 260. Total United States production was 7,645 million pounds, down from the record crop in 1980 of 8,828 million pounds.

Fresh shipments of the 1981 crop increased compared with the previous season. However, a larger percentage remained in storage at the end of the reporting season last year (1980 crop). Shipments through April 24, 1982 were 5,018 loads of 40,000 pounds net weight compared with 4,939 loads shipped through May 3, 1981.

Export movement increased during the 1981-82 marketing season. A total of 273,047 packages was shipped abroad compared with 234,595 packages in 1980-81. Red Delicious continued to be the leading variety exported with about 69 percent of the total. However, that was below the usual amount. In the 1980-81 marketing season Red Delicious accounted for 84 percent of the total. The difference this season was offset by an increase in export of Red Rome which accounted for 13 percent of the total. Most were packed as traypacks but about five percent were 12-3 pound film bags in master cartons.

PROCESSING: Processing fruit size was below average, consequently fruit above 2½" in diameter was at a premium. Another factor affecting pricing was the lower production of York, the preferred canner, and Stayman another preferred variety which some processors paid a premium for along with the York Imperial. Prices (per hundred weight) opened in September with 2 3/4" up Yorks at \$7.25 and other varieties at \$7.00. Yorks 2½-2 3/4" were \$6.00 and other varieties brought \$5.75. Smaller than 2½" apples were \$4.00 with no premium paid by variety. Straight juice apples opened at \$4.25. In mid-October York prices were raised to \$7.50-7.60 for 2 3/4"

up and \$6.50-6.75 for 2½-2 3/4". Other suitable varieties were unchanged. Prices of juice stock also increased to mostly \$4.75. Canner prices remained steady but juice stock continued to increase to mostly \$5.50 by mid-November and mostly \$7.00 by mid-December. By this stage of the season, practically all canners had been bought or contracted for and no further prices were reported. Juice prices declined somewhat in January but were mostly \$7.00 in February and \$7.00-7.50 in March for remaining purchases which were reported. Some processors offered somewhat higher prices on a deferred payment basis.

GROWING CONDITIONS AND HARVESTING: After a very dry season in 1980, there was some relief from drought by spring 1981 rains. However, in mid-April there was considerable injury by low temperatures in the low 20s-30s. The season was about two weeks early at the time with full bloom in southern Virginia to pre-pink to pink in northern sections. Near normal conditions prevailed in May & June, but there were some hot periods in June. Precipitation and temperatures were near normal in July, but in August some record low temperatures occurred the week ending August 23. Rains helped soil moisture the first week of September after a dry August. Harvesting weather was excellent most of the remainder of the season, with a slight delay during the last week of October because of rain. Cool nights and mostly sunny days produced a crop of excellent quality although the size was below average. Harvest was completed the first week of November.

LOCATION: The Appalachian District consists of portions of Maryland, Pennsylvania, Virginia and West Virginia which lie along the Appalachian Mountain Range. The most important producing areas within the district are the Shenandoah Valley of Virginia, West Virginia's Eastern Panhandle. Western Maryland and Southern Pennsylvania.

PACKAGING AND MARKETING: All major shippers packed both traypacks and film bags in master containers. Film bags were mostly three-pound with four and five pound bags also packed in good volume. Bushel and 1 1/8 bushel cartons were also packed for tree run or second grade fruit. A few shippers packed film overwrapped trays.

F. O. B. prices for cartons containing 12-3 pound bags graded U. S. Fancy or better 2 1/4" and larger and for cartons traypack graded U. S. Combination Extra Fancy & Fancy mostly 72-113 size were as follows:

REGULAR STORAGE

Red Delicious: 12-3s opened at \$6.00-7.00, were \$6.50-7.50 throughout most of the harvest season, and \$7.00-7.50 through November and December. In January they were mostly \$7.50. Traypacks 88-113s were \$9.00-10.00 in early September, gradually increased to \$11.00-12.00 by late October and \$12.00-12.50 from mid-December to the end of the marketing season.

Golden Delicious: Supplies of Golden Delicious were limited again as many were diverted to processing; After opening at \$6.00-7.00; the market raised quickly to \$6.50-7.00 and was at about that level the balance of the season. Trays were mostly \$9.00-9.50.

Red Rome: 12-3s were at mostly \$7.00 through Thanksgiving week then decreased to \$6.50-7.00 and remained there through early January. The market strengthened to \$7.00-7.50 in late January. Trays were mostly in the \$9.00-10.00 range except late December and January when they were mostly \$9.00-9.50.

Red Stayman: 12-3s were in the \$6.50-7.50 range during the season with traypacks ranging \$10.00-12.00.

Winesap: 12-3s were in the \$6.50-7.00 range most of the season.

CONTROLLED ATMOSPHERE STORAGE

Red Delicious: 12-3s opened in early January at \$8.00 and were in the \$8.00-9.00 range during the season. Traypacks were at \$13.50-14.00 but were as high as \$14.50 in late January and all of February before demand slowed and the market dropped to the \$11.00-12.00 range by April.

Golden Delicious: Supplies were fairly light and 12-3s were \$7.50-8.00 throughout most of the season. Traypacks were mostly \$10.50-11.00.

Red Rome: Movement was good throughout with most prices between \$8.00-9.00 for 12-3s. Traypacks were mostly \$10.00-11.00.

Red Stayman: 12-3s were mostly \$7.50-8.00 and traypacks opened at \$11.00 but increased to \$12.00-13.00 for much of the season.

CHANGES IN MARKET NEWS COVERAGE: During the season a number of changes were made in coverage. Because of Federal Budget restrictions six market news offices were closed. Federal offices were closed in Minneapolis, Minnesota; Cleveland, Ohio; Kansas City, Missouri; Louisville, Kentucky; and Houston, Texas, as well as Miami, Florida which was staffed by a state reporter.

In addition to these office closings, the reporting of unloads was reduced from 41 cities to a total of 23, also because of lack of funds as a result of the new budget.

In late January the U. S. Postal Service rates for second-class postage virtually doubled, which forced us to go to semi-weekly mailings versus the traditional daily market report mailings.

APPLES COMMERCIAL CROP

(By Crop Reporting Board, Statistical Reporting Service, USDA)

U.S. Commercial apple production was 7.65 billion pounds (3.47 million metric tons) in 1981, 13 percent below last year's record crop and 6 percent less than the 1979 crop. Of the total production 7.61 billion pounds were utilized, 6 percent less than last season. There were 2.73 billion pounds utilized in the East. This was down 19 percent from last year's crop, reflecting the spring freeze damage from Pennsylvania northward along the eastern seaboard. Utilized production fell 21 percent in the Central States to 1.13 billion pounds. The Western States utilized 3.76 billion pounds, 6 percent below 1980.

Washington, the leading State, produced 2.70 billion pounds, 10 percent below last year's record. Production in New York, the second ranking state, totaled 800 million pounds, off 27 percent from 1980. Michigan ranked third with 640 million pounds. The Washington crop was damaged by extremely hot late summer temperatures while Michigan and New York had spring freeze damage.

By variety, the largest percentage increase in production from 1980 was for Gravenstein--up 102 percent. Yellow Newton followed with a 11 percent increase. All other varieties declined, with the largest decline being R. I. Greening, off 35 percent from 1980.

Red Delicious increased its domination of varieties comprizing 40 percent of the 1981 apple crop. Other leading varieties as a percent of production were Golden Delicious, 19 percent; McIntosh, 7 percent; Rome Beauty, 7 percent; Jonathan, 5 percent and York Imperial, 4 percent.

APPALACHIAN DISTRICT SHIPMENTS

Appalachian District truck shipments are shown in units of 1,000 40-pound cartons (40,000 pounds net weight). Shipments were reported on a weekly basis with the first report for the week ending August 8, 1981, and the final report for the week ending April 24, 1982. Shown for comparison are 1979 and 1980 crop shipments.
