Fruit and Vegetable Division

P R E F A C E

This publication is a summary of the Appalachian District apple production, shipments, F.O.B. sales, selected terminal sales, process utilization, and distribution records for the 1983 apple crop. Some of the information is preliminary and subject to revision. This information is provided for its historical interest, and for use in planning and marketing future crops.

The Federal-State Market News Service began collecting weekly apple shipments for the week ending August 12, 1983. Collection of shipping point information and the issuing of daily market reports for the 1983-84 apple season began on September 12, 1983.

The summary was prepared by the Federal-State Market News Service located in Inwood, WV. This office was operated by the United States Department of Agriculture, Agricultural Marketing Service cooperating with the Maryland, Pennsylvania, Virginia and West Virginia State Departments of Agriculture.

Truck shipments on a weekly basis were obtained directly from shippers.

The Appalachian District is composed of the following areas:

- Virginia - Roanoke and nearby points, northward including the Shenandoah Valley and the growing area immediately east of the Blue Ridge.
- West Virginia - The four eastern counties of Jefferson, Berkeley, Morgan, and Hampshire.
- Maryland - The three eastern counties of Allegany, Washington, and Frederick.
- Pennsylvania - Primarily the southeastern counties of Franklin, Adams, York, Berks and Lehigh.

Preparation and publication of the summary was by Paul Eanes, Local Representative, and Linda J. Albright, of the Inwood, Federal State Market News Office.

We wish to express our sincere appreciation to the shippers, brokers, processors, and other members of the industry for their cooperation and time in order to make this report possible.

Summaries will be offered to users of published market news reports on a subscription basis, at a charge of \$4.00 per copy. Additional summaries may be picked up at this office at a charge of \$2.00 per copy until a later release is published, then it will be a back issue charge of \$3.00. Summaries are mailed at a charge of \$4.00 per copy, and can be obtained from:

REVIEW OF THE 1983-1984 APPALACHIAN DISTRICT APPLE SEASON

PRODUCTION AND SHIPMENTS: The four-state Appalachian District produced 1,117 million pounds of apples in 1983 of which 1,113 million pounds were for utilization according to the U.S. Department of Agriculture's Statistical Reporting Service. This was approximately 20 percent less than the 1982 crop and approximately 7 percent less than the previous three year average of 1,197 million pounds. Production by states in million pounds for 1981, 1982, and 1983 respectively, were: Maryland 73, 80 and 77; Pennsylvania 400, 525; and 440; Virginia 465, 500 and 390; West Virginia 200, 230 and 210. Total United States production was 8,197.5 million pounds, an increase of 82.5 million pounds from the 1982 crop. The top ten ranked apple producing states for 1983 are:

(1) Washington	3.00 billion pounds	(6) North Carolina	400 million pounds
(2) New York	1.10 billion pounds	(7) Virginia	390 million pounds
(3) Michigan	750 million pounds	(8) West Virginia	210 million pounds
(4) California	460 million pounds	(9) Oregon	165 million pounds
(5) Pennsylvania	440 million pounds	(10) Idaho	130 million pounds

Fresh shipments of the 1983 crop to April 25 decreased with 4,545 loads of 40,000 pounds (1,000 40-pound cartons) compared to the 1982 crop of 5,830 loads through April 23, 1982. The largest shipments were in November 1983 with 717 40,000 pound units.

The export movement for the 1983-84 marketing season to April 25, 1984, totalled 290,935 cartons as compared to 451,528 cartons for the previous season. This season realized a 36 percent decrease from last year's shipments.

PROCESSING: Processing fruit size was small this season but quality good and prices per hundred weight for canners opened in September for 2 3/4 inch and larger York at \$6.95-8.00, Stayman at \$7.00-8.00 and other varieties \$6.50-7.35. York size 2 1/2 - 2 3/4 inch opened at \$5.45-6.50, Stayman \$6.25-6.50 and other varieties at \$5.00-6.10. All varieties under 2 1/2 inches opened at \$3.20-3.70. Straight loads of juice opened at \$4.00-4.25. Prices for canner/peeler fruit remained constant until there were too few purchases to establish a market in mid-November. Straight juice load prices fluctuated slightly through the season but remained in the \$3.00-4.50 range, mostly \$3.50-4.00 and occasionally higher. The season reports ended April 14, 1984, with prices at \$4.00-4.25 and good quality fruit. The higher seasonal prices for canner peeler stock were mostly indicative of deferred payment installments.

GROWING CONDITIONS AND HARVESTING: Spring weather this season was met with damp conditions, cool nights and frost in some areas. This slowed bud and bloom dates approximately one week to ten days with bloom starting the first week of May. The combination of cooler than normal spring weather with dry and hotter than normal growing season was likely instrumental in crop reduction and small fruit in some areas. Although near normal total precipitation was recorded, it arrived a bit late in the growing season. Harvest in some areas was curtailed by "stop drop" for possible time to enhance color, then started by late September and early October. Harvest of fruit, reported to be in fair condition, was near completion by November 1.

LOCATION: The Appalachian District consists of portions of Maryland, Pennsylvania, Virginia, and West Virginia which lie along the Appalachian Mountain Range. The most important producing areas within the district are the Shenandoah Valley of Virginia, West Virginia's Eastern Panhandle, Western Maryland, and Southern Pennsylvania.

PACKAGING AND MARKETING: All major shippers packed both traypacks and film bags in master containers. Film bags were mostly packed in 12-3 pounds. However, 12-4 pound and 8-5 pound film bags were also packed in moderate volume. Most of the traypack cartons were sized 72-113s, except Romes which were sized mostly 56-100s. Loose pack bushel and 1 1/8 bushel cartons were also packed for tree run and second grade fruit. A few shippers packed film overwrapped trays this season.

TRANSPORTATION TRENDS: All apples from the Appalachian District are moved by truck. Availability of trucks for the season was generally adequate to an occasional slight surplus.

REVIEW (CONTINUED)

F.O.B prices for cartons containing 12-3 pound film bags graded U.S. Fancy or better 2 1/4 inch minimum size and for traypack cartons graded U.S. Combination Extra Fancy & Fancy mostly 72-113 size were as follows:

REGULAR STORAGE

RED DELICIOUS: 12-3 pound film bags opened at \$8.00-9.00 with good demand but prices slipped to \$5.50-6.00 within four weeks and remained at this level until clean-up. Traypack cartons opened at \$10.00-13.00 with slight fluctuation reaching \$8.50-9.00 low for the season by January 2, and closed at \$9.00, February 6, 1984.

GOLDEN DELICIOUS: 12-3 pound film bags opened at \$7.00-7.50 then \$6.00-7.00 after the first week. Prices slipped gradually to \$5.50-6.00 from mid-December and finished at \$5.00-6.00 the week of February 20, 1984. Traypack cartons opened at \$10.00-12.00 and dropped the next week to \$9.00-11.00 fluctuating down to \$8.50-9.00 by January 2, and finished February 6, 1984 at \$9.00.

RED ROME: 12-3 pound film bags opened October 17, at 6.00-7.00 reaching a low of \$5.25-6.00 January 2, 1984, with only slight fluctuation to close at this price. Traypack cartons opened at \$9.00-10.00 and held until November 21, then dropped to \$9.00 with slight fluctuation closing at \$8.50-9.00.

RED STAYMAN: 12-3 pound film bags opened at \$7.00-8.00 gradually dropping to close at \$5.50-6.00. Traypack cartons opened at \$11.00-12.00 remaining until December 12, then increased to \$11.50-13.00 to close January 30, 1984.

WINESAP: 12-3 pound film bags opened at \$6.50-7.50 with little fluctuation to close at \$6.00-6.50. There was not enough traypack cartons reported this season to establish a market.

CONTROLLED ATMOSPHERE STORAGE

RED DELICIOUS: 12-3 pound film bags opened January 30, at \$7.00 and held from February 27 through the season and fluctuated in price very little. Traypack cartons opened February 27, at \$10.00-11.00 and remained there for the season.

GOLDEN DELICIOUS: 12-3 pound film bags opened January 30, at 7.00-7.50 and remained there through the season. Traypack cartons opened at \$9.00-10.00 and held through the season.

RED ROME: 12-3 pound film bags opened January 30, and held through the season at \$7.00-8.00. Traypack cartons opened at \$10.00-11.00 and held through the season.

RED STAYMAN: 12-3 pound film bags opened February 13, at \$7.50-8.00 fluctuating slightly to close at \$7.00-8.00. There were not enough reports on traypack cartons to establish a market.

APPLES COMMERCIAL CROP

(By Crop Reporting Board, Statistical
Reporting Service, USDA)

U. S. Commercial apple production totaled 8.20 billion pounds (3.72 million metric tons) in 1983, 1 percent above the previous year's crop and 6 percent less than the 1981 crop. Of the total production, 8.18 billion pounds were utilized, 1 percent more than 1982. There was 3.10 billion pounds utilized in the East. This was down 2 percent from the previous years utilization. Utilized production was 19 percent in the Central States to 1.18 billion pounds. The Western States utilized 3.90 billion pounds, up 12 percent from 1982.

Washington, the leading state, produced 3.00 billion pounds, 15 percent more than the previous year's crop. Production in New York, the second ranking state, totaled 1.10 billion pounds, down 3 percent from 1982. Michigan ranked third with 750 million pounds produced.

1/ Shipments are final through December 25, and preliminary from January 1 through April 25.

* NOT AVAILABLE AT TIME OF PUBLICATION.

** DOES NOT REFLECT SHIPMENTS PRIOR TO SEPTEMBER 3, 1983.

APPALCHIAN DISTRICT TRUCK SHIPMENTS
(INCLUDING EXPORT)

Appalachian District truck shipments are shown in units of 1,000 40-pound cartons (40,000 pounds net weight). Shipments were reported on a weekly basis with the first report for the week ending August 28, 1983, and the final report for the week ending April 28, 1984. Shown for comparison are 1981 and 1982 crop shipments.

DEFINITIONS OF TERMS

TOTAL PRODUCTION - is the quantity actually harvested plus quantities which would have been acceptable for fresh market or processing but were not harvested because of economic reasons or natural reasons.

UTILIZED PRODUCTION - is the amount sold plus the quantities used at home or held in storage.

UNUTILIZED PRODUCTION - is the difference between total and utilized production which is fruit not harvested for economic or natural reasons and harvested fruit not sold or utilized.

UTILIZATION - refers to first utilization, not necessarily final utilization. For example, frozen fruit includes some fruit that may be later used for making preserves. Grade-outs for fresh market fruit which are processed are included in the processing quantity. Fruit grade-out from canning or freezing and utilized for juice is included with juice.

APPLES, COMMERCIAL CROP - orchards of 100 or more bearing age trees.

PRICES - are a season average for all methods of sale. For a crop sold for both fresh market and processing, the season average price is a weighted average of the fresh and processing price.

Prices for fresh fruit are the average prices producers receive at the point of first sale. This is commonly referred to as the average price as sold. Since the point of first sale is not the same for all producers, prices for the various methods of sale are weighted by the proportionate quantity sold. For example, if in a given State part of the fruit is sold f.o.b. packed by growers, part is sold as bulk fruit at the packinghouse door, and some is sold retail at roadside stands, the fresh fruit average price as sold is a weighted average of the average price for each method of sale. The exception is fresh fruit sales in California, Washington and Oregon which are equivalent returns at packinghouse door. The equivalent packinghouse returns represent adjusted prices.

F.O.B. packed prices are adjusted to an equivalent incoming packinghouse door price by subtracting all costs that accumulate between the incoming packinghouse door and the f.o.b. price. These costs include trading, packing, inspecting fees, selling and other costs. Prices for fruit sold for processing are equivalent returns for fruit delivered to the processing plant door.

Crop value estimates in this report cover the marketing season or crop year and should not be confused with cash receipts for these crops which are on a calendar year. The following procedure is used to compute State values for all commodity groups:

STATE VALUE COMPUTATION PROCEDURE

FRESH MARKET VALUE	=	Fresh Market SAP	X	Fresh Market Utilization
PROCESS MARKET VALUE	=	Process Market SAP	X	Process Market Utilization
"ALL" SALES VALUE	=	Fresh Market Value	+	Process Market Value
"ALL" SALES SAP	=	<u>All" Sales Value</u>		
		"All" Sales Utilization		

For commodities with components not identified by market channel, substitute breakdown name for fresh/processing market and use the same procedure. The procedure used for computation of U.S. season average prices follows:

U. S. SAP COMPUTATION PROCEDURE

FRESH MARKET SAP	=	<u>Fresh Market Value for all States</u>		
		Fresh Market Utilization for all States		
PROCESS MARKET SAP	=	<u>Process Market Value for all States</u>		
		Process Market Utilization for all States		
"All" Sales SAP	=	<u>Sales Value for all States</u>		
		Sales Utilization for all States
