

FRESH FRUIT AND VEGETABLE PRICES 1989

**Wholesale Chicago and New York City
F.O.B. Leading Shipping Points**

United States Department of Agriculture
Agricultural Marketing Service

PREFACE

Prices listed in this report represent sales of certain fresh fruits and vegetables at important shipping points and at New York City and Chicago wholesale terminal markets during 1989.

Prices reported for important shipping points are simple averages of the midpoints of the daily range throughout the year as reported by local market news offices. They refer to sales in straight or mixed carloads or truckloads, unless otherwise noted. An average shipping point price for a month generally is shown only when there were quotations for 6 or more days for daily reports, 4 or more for semiweekly reports, and 2 or more for weekly reports during the month.

FOB shipping point prices represent sales for the commodity loaded on a railcar, piggyback van or truck at shipping point or port of entry. Transportation and protective service charges are not included in prices shown.

Wholesale prices for private sales at New York City and Chicago are simple average of representative prices for each Tuesday. In arriving at the Tuesday prices, local market reporters consider estimated volume of sales at different price levels, quality, condition, and other factors. These prices represent private sales in wholesale lots made by the first seller on the wholesale market. Prices are for stock of generally good merchantable quality and condition. Grades are shown where quoted by grade.
