## PREFACE

The information contained in this summary was obtained from the daily reports published by the Federal-State Market News office located at Rochester and the Transportation Reports Section, Washington, D.C. Additional statistical data was obtained from releases by the U.S. Department of Agriculture and the New York Crop Reporting Service, Albany.

\*\*\*\*\*

We wish to express our sincere appreciation to the growers, shippers, brokers and buyers for their cooperation.

**MARKETING WESTERN AND CENTRAL NEW YORK CABBAGE****(Fresh Market and Processing)****1982 Crop**

Daily market reports on cabbage were issued from the Rochester Federal-State Market News office from August 2, 1982 through April 29, 1983. The information contained in this summary was obtained from these reports, along with reports from the Transportation Section, Market News Branch, and from releases issued by the USDA's Economics Statistics and Cooperative Service and the New York Crop Reporting Service.

According to the New York State Crop Reporting Service, 1982 Upstate New York Cabbage production totaled 3075 1,000 cwt, compared to 2340 1,000 cwt for the 1981 crop. Yield in 1982 was 410 cwt per acre (7500 harvested acres) compared to 325 cwt per acre (7200 harvested acres) in 1981.

Due in part to the large 1982 cabbage yield, storage stocks on November 15, 1982 were 36% above the stocks of a year earlier. Cabbage stocks on January 1, 1983 were 46% above those on January 1, 1982.

The first shipping point market report was issued on August 2. Principal fresh market packs were 50-lb sacks, and 1-3/4 bushel crates or cartons. Large cabbage in bags ranged between \$2.25-2.75 from August 2 thru approximately October 15. Thereafter, prices declined to a range of \$1.50-2.00, and remained weak until mid-April when lighter supplies contributed to an increase to \$3.25-3.75 per bag.
