Canned Beef In Family Meals

APR 30 1964

CURRENT SERIAL RECORDS

The canned beef with natural juices now available through the U. S. Department of Agriculture's Food Distribution Program is prepared from boneless, lean beef--of good quality--U.S. cutter grade or higher. The lean beef is seasoned with salt and packed in 29 ounce cans. This product is fully cooked in its own juices and is ready to eat. It may be stored in any clean, cool, dry place. After opening cans, leftovers should be stored in the refrigerator in a covered container which may be the can itself.

The canned beef with natural juices may be sliced and heated or served cold. It slices easily when chilled in the refrigerator. To remove the chilled contents from the can, cut out the bottom as well as the top of the can and push meat through with the thumbs against the lid.

This tasty canned beef product is a high-quality, protein-rich food. It is an excellent source of iron and a good source of the B-vitamins. It can be used in a variety of main dishes to provide satisfying meals of high nutritive value.

The following recipes were developed by the Human Nutrition Research Division, Agricultural Research Service of the U. S. Department of Agriculture:

Turn dough onto a lightly floured board and knead a few strokes. Roll or pat to 3/4-inch thickness. Cut with a biscuit cutter or cut into squares. Place on beef pie and bake as indicated above.

MEAT SAUCE

1 medium onion, chopped	1-1/2 cups water
1 tablespoon fat from canned beef	1 teaspoon sugar
