Canned Pork and Gravy in Family Meals

The canned pork and gravy now available through the U. S. Department of Agriculture's Food Distribution Program is prepared from currently-produced, good quality pork. It has been boned, trimmed, cut and mixed with gravy before filling into cans and processing. Each can contains approximately 26 ounces of meat and 3 ounces of gravy. The canned pork and gravy should be stored in a cool dry place. After opening cans, left-over meat should be kept in the refrigerator.

The canned pork and gravy is flavorful and when heated is ready to serve just as it comes from the can. Or it may be sliced and heated or served cold. Pork slices best when chilled. In combination with other foods, a variety of delicious main dishes may be prepared. By itself, it is a protein-rich food which is also an excellent source of thiamine. It can serve as the basis for hearty, satisfying meals high in nutritive value. The following recipes were developed by the Human Nutrition Research Division, Agricultural Research Service of the U. S. Department of Agriculture.
