PREFACE

Commodities reported in this summary are outlined in Table of Contents shown below. Mixed cars containing 90% or more of one commodity were reported as that commodity. When no single commodity comprised as much as 90%, cars were classified in their proper mixed category; for example, Mixed Citrus Fruit, Mixed Vegetables, etc.

Shipments shown in detailed tables are rail shipments, including RAIL-TRUCK (piggy-back), moving on initial line-haul waybills, except where the word "Boat" or "BT" is shown directly after the State of origin. The latter are boat shipments of domestic production which moved truck-to-boat. Domestic truck shipments and imports are identified and reported where information was available.

The following abbreviations were used to identify California rail shipments by districts: ND - Northern District; CD - Central District; SD - Southern District; IV - Imperial Valley.

Factors used to convert truck and boat movements to rail carlot equivalents are outlined on page 3.

Imports reported herein were taken from official records of the U.S. Department of Commerce.

Cooperation on the part of railroad, express and steamship agents, and officials of State Departments of Agriculture and farmers' markets in furnishing information, as well as members of the produce industry in furnishing records of motortruck movement, is hereby gratefully acknowledged.
