Report of

BEAN IMPROVEMENT COOPERATIVE

and

**NATIONAL DRY BEAN COUNCIL
RESEARCH CONFERENCE**

Gainesville, Florida
January 5-7, 1982

Proceedings of
Bean Improvement Cooperative
and
National Dry Bean Council Meeting,
January 5-7, 1982

Program Committee:

Par Benapal
Mike Dickson
George Hosfield
Lynn Kerr
David Mok
Roger Schmitt
Jim Wyatt (Chairman)

Local Arrangements Chairman:

Mark Bassett

This report contains summaries of oral and poster presentations made at the Meeting. Most summaries were submitted at the time of the conference but final preparation of the proceedings was delayed several weeks to give opportunity for all contributors to send them. Summaries were reproduced as submitted and were not edited.

The program committee expresses its thanks and appreciation to each one who participated in the meeting.

JIM WYATT
Chairman, Program Committee

Abstracts are arranged to conserve space and reduce reproduction costs; they are not grouped by subject or order of presentation.

TABLE OF CONTENTS

	PAGE
Environmental response patterns in commercial classes of common bean (<u>Phaseolus vulgaris</u> L.). A. Ghaderi, M. W. Adams, and G. Varner	1
Parameters affecting textural characteristics of processed dry edible beans. A. D. Bolles, M. A. Uebersax, G. L. Hosfield, and R. C. Hamelink	3
Morphological, anatomical and genetic studies of seedcoat cracking in dry beans (<u>Phaseolus vulgaris</u> L.). S. S. Korban, D. P. Coyne, J. L. Weihing and M. A. Hanna	7
The effect of stress on seed filling and physicochemical properties on dry edible beans. G. L. Hosfield and M. A. Uebersax	8
Varietal and class diversity and accentuation of bean disease problems in a major production area. J. D. Kelly	12
Water absorption in seeds of dry bean cultivars (<u>Phaseolus vulgaris</u>). S. S. Korban, D. P. Coyne, and J. L. Weihing	14
New bacterial species pathogenic for beans. M. L. Schuster, G. J. Blatchford and A. M. Schuster	14
Effect of stage of maturity and methods of drying upon soakability and texture of dry edible beans (<u>Phaseolus vulgaris</u> L.). N. N. Wassimi, G. L. Hosfield, and M. A. Uebersax	15
Occurrence of aphid transmitted viruses in beans bordered by other crops. J. R. Stavely	16
Composition and utilization of dry roasted bean flour. M. A. Uebersax, M. E. Zabik, and J. P. Lee	17
Evaluation of seed treatments for control of bacterial blight of cowpea. R. D. Gitaitis and J. D. Hamm ..	19
Examination of structural differences among isolines and a cultivar of dry edible bean. G. N. Agbo, M. A. Uebersax, and G. L. Hosfield	20

	PAGE
Web blight of beans in Costa Rica and its control by mulching. J. J. Galindo, G. S. Abawi, H. D. Thurston, and G. Galvez	21
Use of benomyl for control of white mold (<u>Sclerotinia sclerotiorum</u>) of dry beans. J. R. Steadman	21
A study of color change of mature red kidney beans. I. A. Pabon, R. F. Sandsted, and W. L. Hymes	22
Relative virulence of <u>Aphanomyces</u> and <u>Pythium</u> to beans at various temperatures. W. F. Pfender and D. J. Hagedorn	23
Selection for avoidance of white mold in beans as influences by the interaction of different architectures. P. A. Fuller, D. P. Coyne and J. R. Steadman	25
Application of new field and laboratory methods for measuring drybean root tolerances to soil stresses and root diseases A. J. M. Smucker	27
The potential for controlling bean rust by host resistance. J. R. Stavely	28
Functional male sterility in beans. J. E. Wyatt ...	30
Development of an integrated control program for bean root rot in New York: Strategy and progress to date. G. S. Abawi	31
Soil sampling to determine bean root rot potential in field soils from the Central Sands of Wisconsin. K. M. Kobriger and D. J. Hagedorn	33
Advances in breeding for resistance to the leafhopper <u>Empoasca kraemeri</u> in dry beans (<u>Phaseolus vulgaris</u>). S. R. Temple, C. Cardona, A. van Schoonhoven, and N. Galwey	34
Tepary beans: Progress and use in common bean breeding. J. G. Waines, R. M. Manshardt, and C. V. Thomas ..	36
Genetics of stigma position in <u>Phaseolus vulgaris</u> x <u>P. coccineus</u> hybrid materials. R. M. Manshardt and M. J. Bassett	38
Genetic variation and inheritance of iron deficiency in crosses of beans (<u>Phaseolus vulgaris</u> L.). D. P. Coyne, S. S. Korban, D. Knudsen, and R. B. Clark..	39

	PAGE
Cold-wet imbibition injury in beans. U. Ladrör, M. J. Silbernagel, and R. L. Dyke	40
Dinitrogen fixation in field beans. G. A. Kemp and R. J. Rennie	46
Breeding beans for resistance to bacterial brown spot and root rot. D. J. Hagedorn and R. E. Rand	48
Cytoplasmic male sterility in bean. S. A. Mackenzie and M. J. Bassett	50
Assessment of disease response in the seedling stage to <u>Pseudomonas syringae</u> . S. H. Antonius and D. J. Hagedorn	51
Changes in patterns of inheritance of flowering time of dry beans (<u>Phaseolus vulgaris</u> L.) in different environments. H. K. Leyna, S. S. Korban, and D. P. Coyne	52
Multiple inoculation techniques for evaluating resistance of individual bean seedlings to three pathogens. J. C. Faria and D. J. Hagedorn	53
Bean research in Eastern Africa. H. A. van Rheenen ..	56
Comparison of early generations of <u>P. vulgaris</u> x <u>P.</u> <u>coccineus</u> subsp. <u>coccineus</u> and <u>P. vulgaris</u> x <u>P.</u> <u>coccineus</u> subsp. <u>polyanthus</u> crosses. P. Gepts	57
Effects of between-row spacing, cultivation, and genotype on growth and yield of black beans. P. J. Stoffella, B. A. Kahn, and R. F. Sandsted	58
Breeding common beans for improved protein and yield. F. A. Bliss	59
Induced bean mutations: Recessive seedling marker genes for gene mapping. R. T. Nagata and M. J. Bassett	60
Control of root diseases of snapbean with soil fungi- cides and metham sodium applied through overhead irrigation. D. R. Sumner and S. C. Phatak	61
Screening for mixed cropping. S. G. S. Muigai and H. A. Van Rheenen	62
